Expressed Managed Services

Web Security

The IBM Express Managed Security Services for web security is designed to help protect IT investments and productivity by reducing the threat of spyware and viruses delivered via web browsing.

- **Anti-virus -** prevents attacks from unknown threats using heuristic analysis
- **Anti-virus and anti-spyware -** reliably detects and neutralises viruses and spyware before they reach your network
- **URL filtering -** allows your employees to use the Internet for business while reducing risks of inappropriate web surfing

Email Security

A suite of services that scan and monitor the client's Internet e-mail before it ever reaches their network.

- **Anti-spam -** Filters out incoming spam, before it reaches your mail server
- **Anti-virus -** Helps eliminate viruses from inbound and outbound e-mails
- **Image control -** Filters out e-mail containing inappropriate content such as pornography
- **Content control -** Scans outgoing e-mails and attachments for intellectual property or confidential information

Business Partner Value Proposition

Created specifically with partner channel in mind, the IBM Express Managed services for e-mail & Web bundled security offering is:

- Quick and easy to sell
- Simple to implement
- Competitively priced
- Provides new source of annuity revenues
